

GREENLAB INNOVATION CENTER DEVELOPER

-PROJECT MANAGER WITH GREAT STAKEHOLDER MANAGEMENT SKILLS

You are the type of person who

- believes in the urgency of the clean-energy transformation
- is very good at your job and want to make a greater personal impact on the world
- has great structure and planning skills
- is self-driven and a strong executer who get's things done in a timely manner
- is dedicated to make sure the new GreenLab Innovation Center is built successfully

About GreenLab

GreenLab works to transform the way green energy is produced, converted, stored and put to use. We know that the world needs a green transition if we are to successfully meet the challenges posed by climate change. And while we acknowledge and encourage the personal efforts made by individuals to be climate conscious consumers, we believe that the most effective way of creating an impact is by working at a system level.

This is why we have created a green industrial park where the surrounding local community can benefit fully from the power harnessed from sustainable energy sources. A business park of the future where nothing goes to waste and where everything is connected by an intelligent grid of energy and data. All supported by a uniques public/private partnership model.

We work tenaciously to find the unexploited synergies between green energy, PtX technologies, and industrial energy use. Our dream is to inspire others all over the world to build industrial parks based on GreenLab's business concept.

Your role

With reference to GreenLab's CEO, Christopher Sorensen, your role will be to aggregate and coordinate all users, owners, designers and builders to ensure delivery for the new GreenLab Innovation Center, fully active with all related R&D, education, incubation, showroom and event activities.

Tasks

- Launch GreenLab's innovation center building project with associated activities
- Concept development / concept brief including:
 - GreenLab Academy – education activities and facilities
 - Conference center options
 - Incubator for innovation
 - R&D Partners – activities and facilities
 - Showroom
 - Office space
- Ownership structure and funding
- Stakeholder management internal and external

GreenLab

Kåstrupvej 22

Denmark
info@greenlab.dk

- Architect collaboration

Qualifications

You have a proven track record executing cluster developments and experience from other physical innovation projects will be considered a benefit. We are seeking a person with the following competencies:

- Good planner with a great overview and an eye for details
- Strong executer who gets things done
- Great stakeholder management skills and ambassadorship
- Excellent written and oral communication skills – Danish and English
- Self-driven person who easily finds solutions to practical issues

Work location

Skive/Aarhus. Our green industrial park is located north of Skive and we also have office facilities at Incuba, Navitas in Aarhus. Flexibility is key and it will be possible to work remotely when suitable.

How to apply

At GreenLab we strive to hire people who are purpose-driven, we favor autonomy and we work closely together as a team. We believe in a flat organisation and that everyone plays an important role in our journey towards creating a power shift.

Application: Send your CV with a cover letter telling us why and how you are purpose-driven towards a greener future, and how you want to contribute to creating a power shift with GreenLab
